PROFILE

TECHNICAL DESIGN

- / Wooden inner frame
 - / Spring system: nosag spring
 - / Seat in polyurethane foam "density" 37 kg/m³
 - / Back in polyurethane foam, "density" 28 kg/m³
 - / Loose back cushion, chambered, filled with rhombus-shaped foam rods (80 %) and crimped, siliconised polyester fibres (20 %).
 - / Standard foot: Tubular steel leg, fine-grain, powder-coated RAL 9005 jet black
- The data of "density" can vary in a range of +/- 10 %.

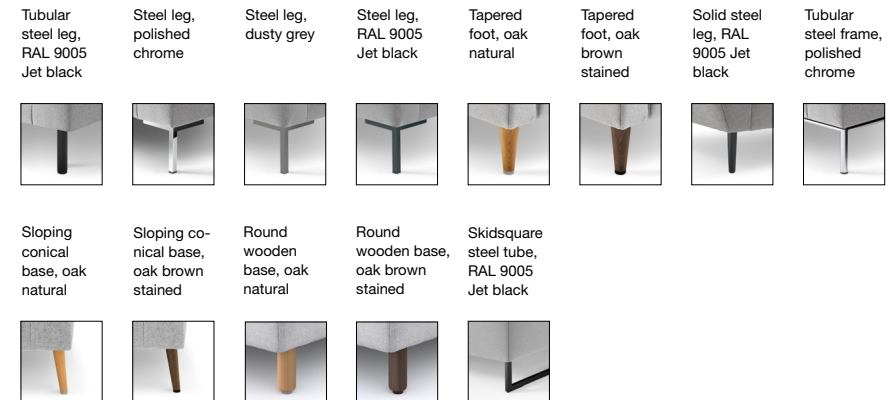

INFORMATION

- / **Choice of seat height 42, 45 or 48 cm. However seat height 48 cm is only possible with the solid steel leg, tubular steel leg and tapered foot oak (even sloping conical bases).**
- / **The legs can be positioned either slightly inwards or directly at the corner in this range. If you would like them positioned slightly inwards, please specify this when placing your order. Only legs that are underneath a side section are positioned slightly inwards. The ASS-PSZ model always has legs that are positioned slightly outwards due to the risk of tipping.**
- / **Models can optionally be ordered with piping, against surcharge. Fabric piping in grey or anthracite; faux leather piping in browngrey or black.**
- / PB models can only be coupled along the narrow side.
- / With velours covers, please note the following points:
 - If models are facing different directions (such as corner seating or a group of armchairs), the pile will lie in different directions. This means it will reflect the light differently and create a different colour impression.
- / There are more dividing seams in leather covers than in fabric covers. Detailed information about this can be found in the Info section.
- / For ergonomic reasons, only the seat area of model ASS-PSZ – not the leg rest – is sprung. So if the leg rest is used as a seat it will feel much firmer.
- / ASO and ASS-PSZ models are not designed to be independent. Do not create corner groups consisting of two ASOs. linear arrangements are possible.
- / High-quality, casual upholstery.
- / Repeat and patterned fabrics cannot be processed with this range.

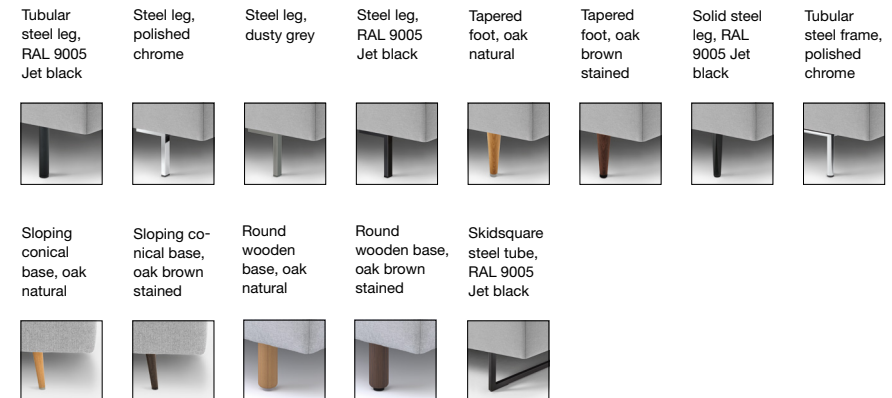

High-quality, casual upholstery that forms waves/leaves indentations that are typical of the material.
