

Design: Böttcher Kayser

freistil 142

PROFILE

TECHNICAL DESIGN

- / Wooden internal frame
 - / Spring system: Nosag spring
 - / Seat cushion in polyurethane cold foam, "density" 37 kg/m³, covered with a chambered pad filled with foam-fibre filling.
 - / Back cushion in polyurethane foam, density 30 kg/m³, covered with a chambered pad filled with foam-fibre filling.
 - / Loose back cushion, chambered, filled with rhombus-shaped foam rods (80 %) and crimped, siliconised polyester fibres (20 %).
 - / The backrest cushions (RUK) integrated into the models are also available as RUK-RO (backrest cushions with roller) for an additional charge. The roller prevents the cushions from sliding into the seat.
 - / Plastic foot
- The "density" details may vary within a tolerance range of +/- 10 %.

LEG VERSIONS

Steel single
foot,
RAL 9005
Jet black

INFORMATION

- / The chambered sections of the pads may be visible in the cover (= characteristic of high quality upholstery worked into pads)
 - / The range has only limited suitability for velour covers. The felled seams or piping can cause pile channels here.
 - / With velour covers, modular groups here have pile layers in different directions and therefore varying gloss behaviour.
 - / There are more dividing seams in leather covers than in fabric covers. Detailed information about this can be found in the Info section.
 - / With models ARB-PSZ and ASE-PSZ, for ergonomic reasons, only the seat area is sprung but not the footrest. It therefore feels firmer when used for sitting.
- Repeat or sample fabrics can not be used in this range.

A high-quality, especially casual upholstery that forms waves/leaves indentations that are typical of the material. This waviness may even occur in new condition.
