## PROFILE

### TECHNICAL DESIGN

- / Wooden inner frame
- / Spring system: nosag spring
- / EPT no spring system
- / Seat in polyurethane foam, "density" 37 kg/m<sup>3</sup>, covered with a pad filled with foam fibre mix
- / Back in polyurethane foam, "density" 28 kg/m<sup>3</sup>, covered with a pad filled with foam fibre mix
- / Standard foot: plastic

The data of "density" can vary in a range of +/- 10%.

### INFORMATION

- / If desired, the customer can increase the seat height by 25 mm. Seat height modules are enclosed.
- / Ticking chamber webs in the pads can show through to the cover (characteristic feature of high-grade upholstery pad workmanship).
- / The range is only suitable for velour covers to a limited extent. The fell seams and piping can lead to lines in the pile.
- / With modular systems, velour covers can lead to different pile alignments and therefore to different shine properties.
- / There are more dividing seams in leather covers than in fabric covers. Detailed information about this can be found in the info section.
- / For ergonomic reasons, only the seat area of model ASS-PSZ – not the leg rest – is sprung. So if the leg rest is used as a seat it will feel much firmer.

A high-quality, especially casual upholstery that forms waves/leaves indentations that are typical of the material. This waviness may even occur in new condition.

### LEG VERSIONS

Plastic leg (standard foot)    Tubular base frame, polished chrome
