PROFILE

TECHNICAL DESIGN

- / Wooden inner frame
- / Spring system: nosag spring
- / EPT no spring system
- / eat in polyurethane foam "density" 37 kg/m³, covered with a pad filled with foam fibre mix
- / Back in polyurethane foam "density" 30 kg/m³, covered with a pad filled with foam fibre mix
- / Standard foot: plastic

The data of "density" can vary in a range of +/- 10 %.

INFORMATION

- / On desire the customer can increase the seat height by 25 mm. Seat height modules are enclosed.
- / There are more dividing seams in leather covers than in fabric covers. Detailed information about this can be found in the Info section.
- / For ergonomic reasons, only the seat area of model ASS-PSZ – not the leg rest – is sprung.
So if the leg rest is used as a seat it will feel much firmer.
- / With velours covers, please note the following points:
 - If models are facing different directions (such as corner seating or a group of armchairs), the pile will lie in different directions. This means it will reflect the light differently and create a different colour impression.
 - Felled seams or piped seams will result in an alley-like appearance in the pile.
 - Shadow effects are created when the fabric is placed with the pile running in a different direction.
 - In the case of seams that run vertically, the fabric colour on one side of the seam may appear lighter than on the other.

A high-quality, especially casual upholstery that forms waves/leaves indentations that are typical of the material. This waviness may even occur in new condition.
